that also satisfies  
sophisticated  
requirements**

# COFFEE GRINDERS

## 903/1003

The 903 and 1003 models are notable for their compactness, ease of use, and astounding grinding capacity.

These qualities make them eminently suitable for small to medium-size coffee and grocery stores.

- Specially developed motors allowing large grinding capacity at all degrees of fineness.
- Preservation of coffee's unique aromatic oils thanks to uniform, gentle and cool grinding made possible by built-in fan and specially sharpened discs developed by ditting.
- Continuously variable adjustment of grinding fineness.
- Minimal coffee particles left in discharge tube thanks to built-in vibrating device or manual tapper.
- Efficient bag shaking device (KR/KFR models) distributes grounds evenly into bag and ensures all particles are dispensed.
- Precision grinding discs made of high-quality material that is extremely wear-resistant. The original discs can be used 2-3 times after re-sharpening.
- Easy to maintain and clean.

### Technical data 903

Voltage/frequency	220-230V / 50Hz / 1*
Motor power	0.62kW
Average grinding capacity	700g/min.**
Hopper capacity	500g
Grinding discs ø	90mm
Net weight	24kg
Dimensions (WxDxH)	174x196x532mm
Standard colour	brown
CE-Conformity	

### Technical data 1003

Voltage/frequency	220-230V / 380-400V / 50Hz / 3*
Motor power	0.75kW
Average grinding capacity	1000g/min.**
Hopper capacity	500g
Grinding discs ø	100mm
Net weight	24kg
Dimensions (WxDxH)	174x196x532mm
Standard colour	brown
CE-Conformity	

\* Other electrical specifications are available upon request

\*\* These figures may vary according to the method of roasting and type of coffee beans
